As a developer I want to enhance the connector with more functionality. To enable myself to create a better agent.								
	Visit tygron	Timo	5		B	Not Done		Make sure connector is finally working properly so we can focus on goal
	Visit tygron	Michiel	5		B	Not Done		Priority B, really important to make sure we can start programming the agent
	Create more percepts	Stefan	4		E	Not Done		We probably already have all percepts needed, if it turns out we don't, we will make them ourselves
	Connect to specific session	Stefan	6		B	Not Done		We need to be able to get multiple agents in the same section
	Communicate with other teams about finishing the connector	Michiel	1		A	Not Done		We should really finish the connector at this point
As an agent When in a simulation I am able to buy ground if I think this is beneficial for me. To construct things that are part of my goals.								
	Implement the strategy we created last week to buy ground	Daan	15		C	Not Done		Priority C, because we have some weeks left to implement the strategies, but we really need the agent to make some decisions and strategies at this point of the project
	Test the code by running the agent and improve if necessary	Stefan	7		D	Not Done		Priority D, because creating it is at this moment slightly more important than testing it
As an agent When in a simulation I am able to destroy stuff if I think this is beneficial for me. To make room for construction or to optimize a certain indicator.								
	Implement the strategy we created last week to destroy buildings	Job	15		C	Not Done		Priority C, because we have some weeks left to implement the strategies, but we really need the agent to make some decisions and strategies at this point of the project
	Test the code by running the agent and improve if necessary	Timo	7		D	Not Done		Priority D, because creating it is at this moment slightly more important than testing it
As an agent When in a simulation I am able to build stuff if I think this is beneficial for me. To optimize a certain indicator or to reach a construction goal.								
	Implement the strategy we created last week to build buildings	Michiel	15		C	Not Done		Priority C, because we have some weeks left to implement the strategies, but we really need the agent to make some decisions and strategies at this point of the project
	Test the code by running the agent and improve if necessary	Daan	7		D	Not Done		Priority D, because creating it is at this moment slightly more important than testing it
As a developer I want to describe myarchitecture so that it is clear to people what our architecture is								
	Extend the architecture document	Michiel	3		A	Not Done		Priority A, because it is a deliverable
As a developer I want to describe our interaction design so this design is clear to us and to others								
	Create an interaction design document	Stefan	7		A	Not Done		Priority A, because it is a deliverable
As an agent I want to adopt goals according to the indicators so that i can improve my score.								
	Define goals in the agent to make sure it want to complete its indicator	Job	10		B	Not Done		Priority B, because it is the main goal to achieve 100% on all indicators, so the agent is based on this
	Coordinate between different goals	Timo	14		C	Not Done		The agent needs to prioritize one goal at a time, so there needs to be a mechanism to coordinate between them
As a developer I want to make a sprintplan so that it is clear to all developers what needs to be done this week								
	Create a new sprintplan	Timo	2		A	Not Done		Priority A, because it is a deliverable
	Create a new retrospective	Daan	2		A	Not Done		Priority A, because it is a deliverable
As a user I want an agent to have a vision with indicators, so that I know what to expect from this agent.								
	Add one more indicator	Job	2		B	Not Done		We thought of one more indicator, priority B because it is important to add it quick
As a developer I want to make sure to use CI wherever I can To make sure that my code always works								
	Add travis.yml file to run tests on the goal	Stefan	2		A	Not Done		This is very important as this is something we want to have up ASAP
