

User Story	Task	Assigned to	Estimated Hours	Actual spent hours	Priority	Status	PR	Notes					
As a developer I want to enhance the connector with more functionality. To enable myself to create a better agent.													
	Visit tygron	Michiel	5	5	B	Done		Discuss the possibility to split the environment					
	Visit tygron	Stefan	5	5	B	Done		Discuss the possibility to split the environment					
	Split environment into a seperate module	Stefan	10	15	C	Done		Optional: we will try to implement this, but maybe it is not possible or not needed					
As an agent When in a simulation I am able to buy ground if I think this is beneficial for me. To construct things that are part of my goals.													
	Explore the possibilities to decide on a piece of land to buy	Timo	5	3	A	Done		Created an issue					
	Come up with a implementation idea and discuss it with the other groups	Timo	5	3	A	done		We can use the created custom actions for this					
	Implement the above implementation idea to decide on a piece of land to buy	Stefan	10	1	C	In Progress		Didn't had time for this, other features had priority					
	Write goal code for the buyland module	Daan	5	2	B	In Progress		Not possible to implement this in goal for now. We need the implementation in the connector for this.					
	Write a test for the buyland module	Daan	5	-	B	Not Done		Not possible since we haven't enhance the module yet					
As an agent When in a simulation I am able to destroy stuff if I think this is beneficial for me. To make room for construction or to optimize a certain indicator.													
	Percept different costs for destroying buildings and the floorspace of different buildings	Stefan	5	2	D	In Progress		Add area to buildings percept					
	Determine the best building to destroy using the knowledge above	Job	3	4	D	Done							
	Implement a sort method that sorts the buildings depending on the task above	Job	8	3	D	In Progress		The area of a building percept wasn't merged until Friday, so this isn't finished yet					
As an agent When in a simulation I am able to build stuff if I think this is beneficial for me. To optimize a certain indicator or to reach a construction goal.													
	Find out how we can build without just replacing an old building.	Michiel	9	9	A	Done							
	Discuss with the other groups about this implementation	Michiel	5	7	A	Done							
	Implement this new way in the connector	Michiel	8	5	C	Done		Done by another group, but tested this implementation a lot					
	Enhance the goal code with the new implementation	Timo	7	9	B	Done	#46						
	Enhance the test for the build module	Timo	5	5	B	Done	#46						
As a developer I want to describe myarchitecture so that it is clear to people what our architecture is													
	Extend the architecture document	Michiel	5	3	A	Done	#48						
	Extend the architecture document	Timo	-	5		Done	#48	Reformatted the percepts and added the requests percept Added a visualization of our goal code					
	Extend the architecture document	Stefan	-	5		Done	#48	Add information about EIS					
As an agent I want to build green constructions to improve my indicator score													
	Determine a plan for when to build buildings and when to build green constructions	Job	3	4	B	Done	#43						
	Make sure upgrading a building to a green building improves the green indicator	Job	5	2	C	Not Done		This apparently can't be added in Tygron, because there is no query that returns this					
	Implement the above mentioned tasks in goal	Job	10	12	B	Done	#43						
As an agent I want to handle requests so I can interact with other stakeholders													
	Enhance code to work with the new percept	Daan	2	6	B	Done							
	Enhance the request module to respond on different kind of requests	Daan	4	8	B	Done		Havn't been able to make a PR out of this yet, since tygron was down friday					
	Test the request module so it works correctly	Michiel	3	4	C	Done		Had some problems with pre and post conditions, Daan fixed this					
	Test the request module so it works correctly	Daan	4	4	B	Done		Added more tests and made the tests more specific to the module.					
As a developer I want to describe our interaction design so this design is clear to us and to others													
	Set up the final report file and add the interaction design sections.	Daan	1	1	C	Done							
	Rewrite the user section so that its more fitting for our new approach	Daan	4	4	C	Done							
	Write a plan for the evaluation turing test according to the feedback	Daan	6	6	C	Done							
As a developer I want to make a sprintplan so that it is clear to all developers what needs to be done this week													
	Create a new sprintplan	Job	3	3	A	Done							
	Create a new retrospective	Timo	3	3	A	Done							
As a user I want an agent to have a vision with indicators, so that I know what to expect from this agent.													
	Fine tune the indicators: make them possible to fulfill in reality	Job	3	2	D	In Progress		Finetuned them a little more, but we will keep doing this until we have written all goal code					

As a developer I want to demo my product so that my stakeholders can give feedback during development													
	Prepare demo for 8 juni	Daan	8	-	B	Not Done		Done by Job					
		Job	-		2	Done							
As a developer I want to test all of my code so that I'm sure that it works properly													
	Get the main module test to work, it always fails the in clause at the moment	Stefan	5		5 A	Done							
	Create tests for the request module	Timo	5	-	B	Not Done		Michiel did this, apparently we planned this twice by accident					
	Create tests for the switching between goals	Timo	5		5 B	Done	#40, #42	Might need to adjust a bit after the code is more finalized					
	Totals	Stefan	35		33								
		Timo	35		33								
		Michiel	35		33								
		Job	35		32								
		Daan	39		31
