

User Story	Task	Assigned to	Estimated Hours	Actual spent hours	Priority	Status	PR	Notes								
As a developer I want to enhance the connector with more functionality. To enable myself to create a better agent.																
	Visit tygron	Job	5		B	Not Done										
	Visit tygron	Daan	5		B	Not Done										
	Implement more functionality*	Stefan	7		C	Not Done		We have to discuss with other groups and tygron what is still needed for the connector before we can specify this task more specific.								
As an agent When in a simulation I am able to buy ground if I think this is beneficial for me. To construct things that are part of my goals.																
	If we need some extra space around a destroyed building, buy that land	Daan	9		B	Not Done										
	Determine the best piece of land to buy for a new building if destroying one is not possible	Daan	8		C	Not Done										
	Manually test the functionality of the two tasks above and improve if necessary	Michiel	7		C	Not Done										
As an agent When in a simulation I am able to destroy stuff if I think this is beneficial for me. To make room for construction or to optimize a certain indicator.																
	Make a list of all buildings that should be destroyed	Job	10		B	Not Done										
	Let the agent destroy a building on the list if it needs to destroy a building	Job	4		B	Not Done										
	Manually test the functionality of the two tasks above and improve if necessary	Timo	7		C	Not Done										
As an agent When in a simulation I am able to build stuff if I think this is beneficial for me. To optimize a certain indicator or to reach a construction goal.																
	The agent should know were land is free to build on, to be able to build the desired building	Michiel	8		B	Not Done										
	The agent needs to build the right building: so it needs to be able to choose the building need	Michiel	5		B	Not Done										
	Manually test the functionality of the two tasks above and improve if necessary	Stefan	7		C	Not Done										
As a developer I want to describe myarchitecture so that it is clear to people what our architecture is																
	Extend the architecture document	Michiel	3		A	Not Done		Priority A, because it is a deliverable								
As a developer I want to describe our interaction design so this design is clear to us and to others																
	Prepare ID meeting for monday 30 june	Michiel	7		B	Not Done		Priority B, since it is one of the few chances to get feedback on this								
	Enhance the ID document for the meeting	Stefan	5		B	Not Done										
As an agent I want to adopt goals according to the indicators so that I can improve my score.																
	Coordinate between the different goals	Timo	10		C	Not Done		Some coordination is needed since a lot of tasks use this as well								
As a developer I want to make a sprintplan so that it is clear to all developers what needs to be done this week																
	Create a new sprintplan	Job	2		A	Not Done		Priority A, because it is a deliverable								
	Create a new retrospective	Timo	2		A	Not Done		Priority A, because it is a deliverable								
As a user I want an agent to have a vision with indicators, so that I know what to expect from this agent.																
	Enhance indicators for upgrades of buildings	Job	2		E	Not Done		We might want to enhance the indicators a bit so that upgrading buildings would count as destroying. This doesn't have a high priority since there's a lot of other stuff to be done								
	Labels for excel sheets of indicators	Job	7		B	Not Done		To be able to use custom indicators we probably need to add labels, this depends a bit on the implementation by the group thats fixing this issue. See issue #53 on git								
As a developer I want to demo my product so that my stakeholders can give feedback during development																
	Prepare demo for 3 juni	Daan	8		A	Not Done		Priority A since it's an important demo								
As a developer I want to test all of my code so that I'm sure that it works properly																
	Write tests on process of destroying and building new buildings	Stefan	8		B	Not Done		Priority B, because testing the code is really important to make sure it works properly								
	Write tests on the coordination between goals	Timo	8		B	Not Done		Priority B, because testing the code is really important to make sure it works properly								
As a developer I often need help from my co-developers so I can work more efficiently																
	Solve goal problems when they occur	Timo	3		D	Not Done		Priority D because they are not certain to occur and when they occur other developers might be able to fix them on their own								
	Solve git and environment problems when these occur	Stefan	3		D	Not Done		Priority D because they are not certain to occur and when they occur other developers might be able to fix them on their own
